Data Visualization with Power BI and Tableau

Practical – I

Roll No.: T013	Name: Saqlain Khan
Class: TYIT	Batch: 1
Date of Assignment: 23-07-2026	Date/Time of Submission: 23-07-2026

Part B – Program

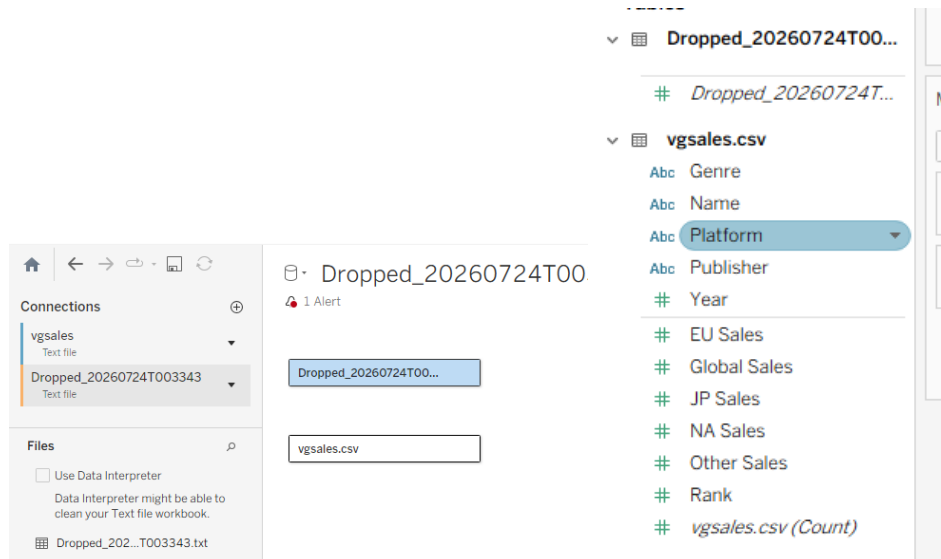

Getting Started with Tableau and Building Basic Visualizations

- Connect to a CSV dataset and explore the Tableau interface
- Identify and differentiate Measures and Dimensions
- Convert fields between discrete and continuous and observe changes
- Create and customize a basic bar chart
- Build a line chart for time-series analysis
- Create a geographic map visualization
- Combine multiple charts into a simple interactive dashboard

A) STEP 1 :- Open Tableau and Import the Text File

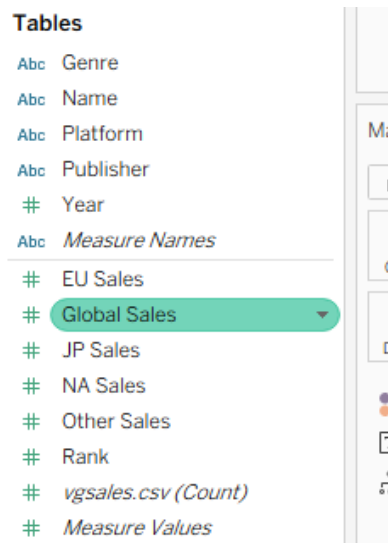

STEP 2 :- After importing the dataset Go to Your Sheet for the Data

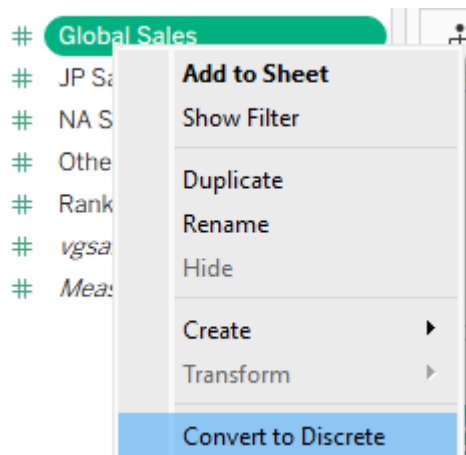

B) STEP 3 :- Differentiate between the Measures and Dimensions

Measures	Dimensions
Numeric values	Descriptive values
Used for calculations	Used for categorization
Can be aggregated (Sum, Avg)	Cannot usually be aggregated
Example: Sales, Profit	Example: Product, Region

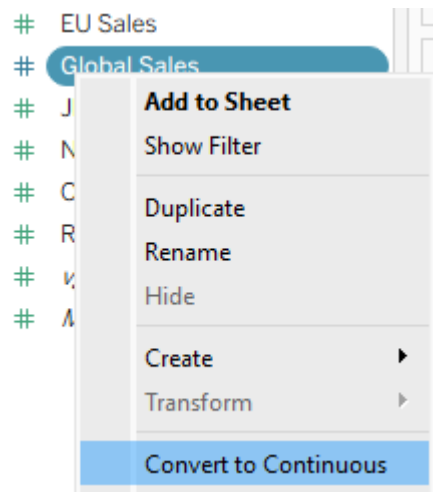

Measures & Dimensions in Tableau

C) STEP 4 :- Select any one of the column for it to get converted into Discrete

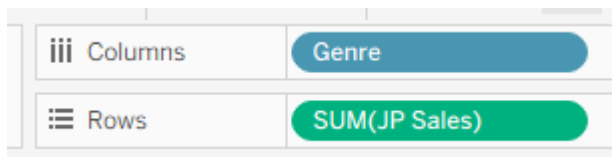

STEP 5 :- Click on Convert and that Part will change its color into blue pill

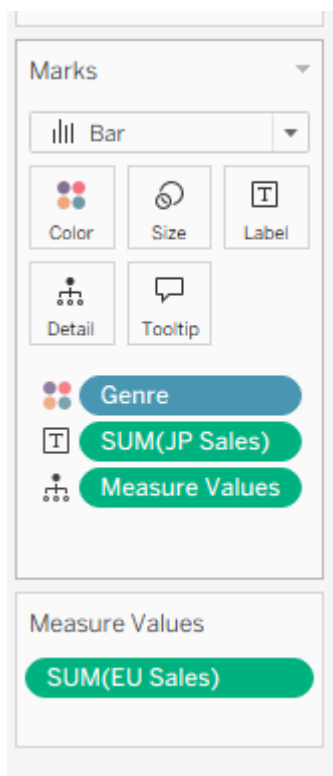

STEP 6 :- To convert into Continuous, Right click after discrete and click on it

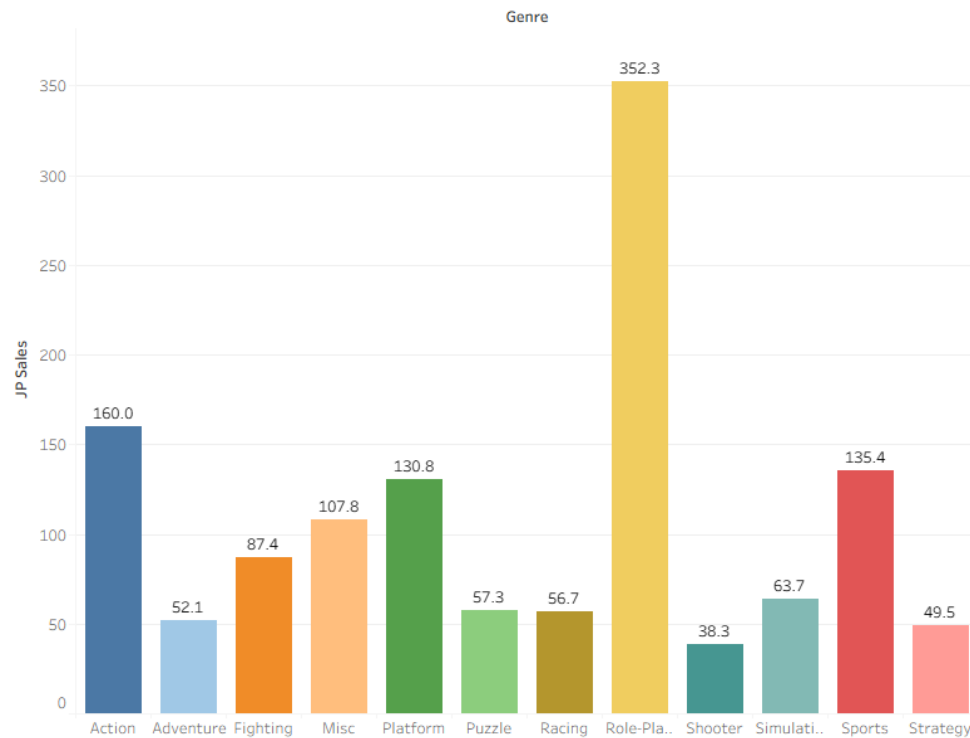

D) STEP 7 :- To create a basic bar chart, Take the discrete and continuous into the Rows and Columns

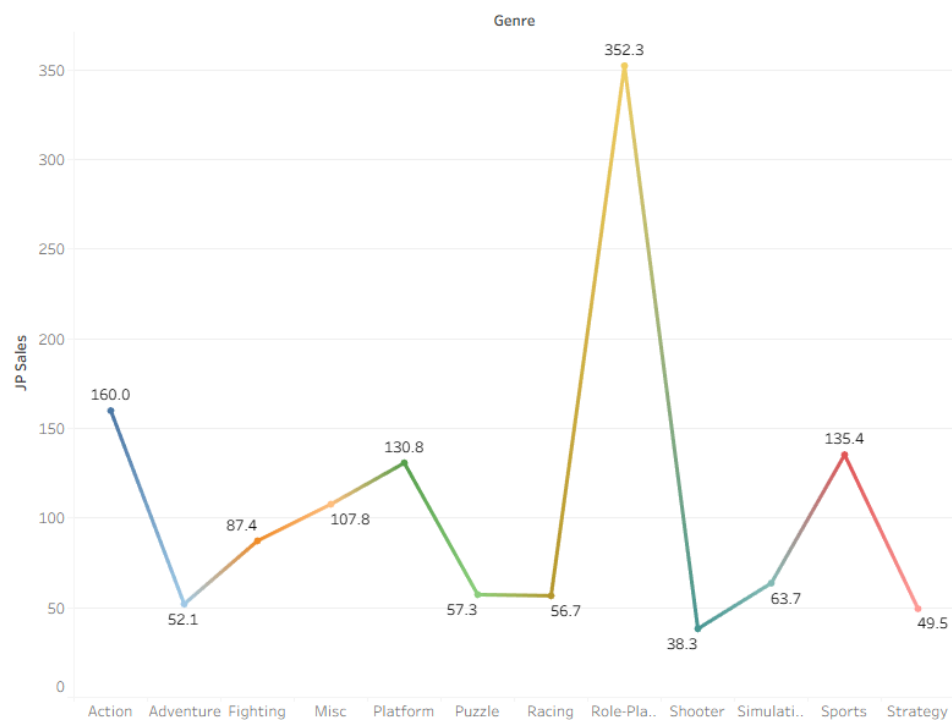

STEP 8 :- Add the Color and Label into the Bar Chart

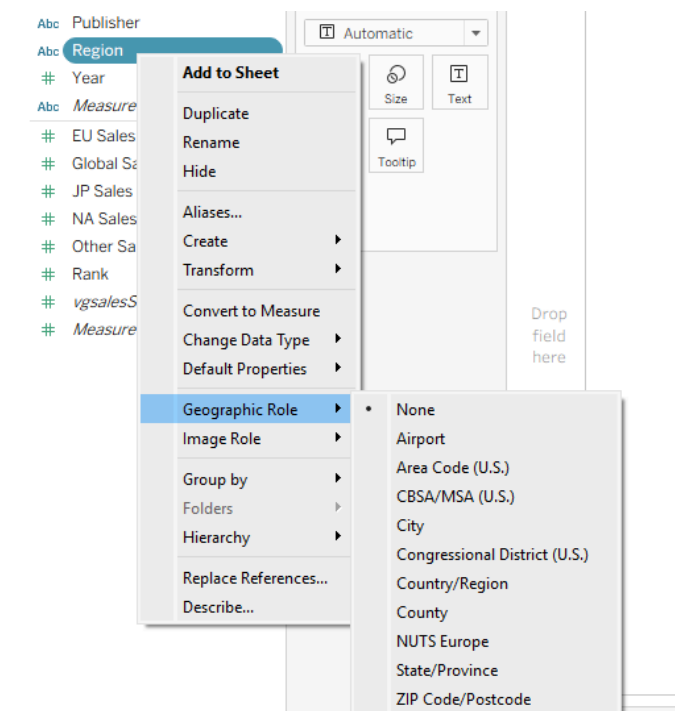

E) STEP 9 :- In the same way, Create the Line Chart by just changing Bar into Line

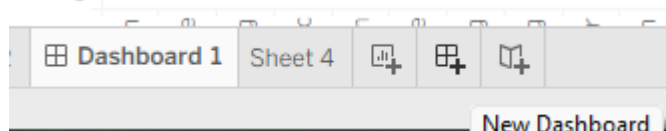

F) STEP 10 :- To create the Geographic Map, Go to your region column and right click and select on country

STEP 11 :- Double click on Region and it will generate the Map and add the data inside Color and Label

G) STEP 12 :- To create a dashboard, Click on this to create one

STEP 13 :- Select all the sheets

Sheets

Sheet 1

Sheet 2

Sheet 4

STEP 14 :- Combine all and Dashboard is created
